

AMINOLab® – Ordersheet

Technical Service Manager: _____
 Customer (Company, Institute, FA-Number): _____
 City: _____ Country: _____
 Description / comments on samples: _____
 Expected contents for suppl DL-Met: _____ %, L-Lys: _____ %, L-Thr: _____ %, MHA-FA: _____ %, MHA-Ca: _____ %, L-Trp: _____ %, others: _____ %

Systematic classification of samples:

a) Mixed feed or feed additive

- ☐ Complete feed ☐ Feed concentrate ☐ Trial feed ☐ Other type: _____
☐ Premix ☐ Biolys®
 - Feed sample for what type of animals?
☐ Broiler ☐ Layer ☐ Rearing pullet ☐ Turkey ☐ Pig/Swine ☐ Sow ☐ Ruminants ☐ Fish
 - Phase: ☐ Starter ☐ Grower ☐ Finisher ☐ Lactating ☐ Other: _____

b) Feed ingredient (raw material)

Ingredient name: _____
 Variety / type of processing: _____
 Country of origin: _____

c) Physiological sample

- ☐ Digesta ☐ Feces ☐ Carcass ☐ Plasma/Serum ☐ Others: _____

Required analyses:

a) Chromatographic methods

- ☐ All AA, except Tyr, Trp¹⁾ (Ox + Hyd) ☐ Tryptophan¹⁾ (alkaline hydrolysis)
☐ Supplemented AA (extraction) ☐ Supplemented Tryptophan³⁾
☐ AA in premix or Biolys® ☐ MHA (Alimet™, Rhodimet™ AT 88, Sumitomo-Liquid)
☐ Tyrosine (acid hydr without Ox) ☐ MHA-Calcium

b) Near-infrared spectroscopy (NIRS) of ingredients¹⁾

NIRS-Estimation of all important AA

c) Other analyses: _____ Note: AA = amino acids, Ox = oxidation of met and cys in protein

☐ I prefer chromatographic analysis to NIRS¹⁾

Priority: ☐ Normal ☐ Urgent (until: _____) ☐ Low

Shall analyses be charged?²⁾ ☐ No (customer service, trials, etc) ☐ Yes (non customer)

Date:

Signature:

¹⁾ NIRS enables very fast analysis. For ingredients NIRS amino acid analysis is applied, whenever possible.

²⁾ As agreed with the Technical Service Manager of the region.

³⁾ Supplemented tryptophan can only be reported, if the main ingredient composition of the feed is given in percent.
 This is to enable the necessary correction for natural free tryptophan contents (blind values).
